

RULE NO. 21
Fire Protection

A. Furnished Under Filed Rate Schedules

Fire Protection service will be furnished by the utility only at the rates and under the conditions set forth in an appropriate rate schedule for the service filed as a part of these tariff schedules, except as such service may be supplemented or amplified by more detailed contractual arrangements after authorization therefore has first been obtained from the Public Utilities Commission.

B. Other Specific Considerations

Specifications, locations, installation, and the responsibility for the maintenance of fire hydrants, public and private fire protection facilities, connecting mains, and their ownership may be subject to negotiation between the utility and the applicant. Fire hydrants and public and private fire protection facilities will be installed to the requirements of the utility and when owned by the utility will be subject to such conditions as the Public Utilities Commission may determine based upon the compensation received for this service.
